

**Amendment to the Claims:**

This listing of claims will replace all prior versions and listings of claims in the application:

1. (Currently Amended) A process for the preparation of plastics composites of three layers, wherein the first layer comprises a ~~fluoropolymer~~, polyvinyl fluoride, the second, middle layer comprises polycarbonate based on bisphenol A and the third layer comprises ethylene-vinyl acetate copolymer, characterised by the following steps to be executed one after the other:
  - a) preparation of a plastics composite of two layers, wherein the first layer comprises the ~~fluoropolymer~~ polyvinyl fluoride and the second layer comprises the polycarbonate,
  - b) application of the third layer of ethylene-vinyl acetate copolymer to the polycarbonate layer of the plastics composite of two layers.
2. (Original) A process according to claim 1, characterised in that the plastics composite of two layers in the process step b) has a temperature at which the ethylene-vinyl acetate copolymer does not undergo thermal damage, and in that the layer of ethylene-vinyl acetate copolymer is applied as a film to the plastics composite of two layers.
3. (Original) A process according to claim 2, characterised in that the plastics composite of two layers in process step b) has a temperature from 20°C to 120°C.
